

SpectroPulverizer® In-field Sample Grinding and Pelletizing Kit

- Portable Grinder
- Portable Press
- Battery powered
- Fast and efficient
- Lightweight
- Rugged Case

The SpectroPulverizer®* is a small portable in-field grinding and/or pelletizing kit ideally used with hand-held XRF analyzers. Its unique operation quickly and efficiently pulverizes the sample contained within its sample chamber in a short amount of time. In addition to pulverizing, a unique chamber design allows it to be inverted and a pelletizing ring may be inserted to quickly make an in-field pellet for fast analysis of any sample. The lightweight portable grinder runs on a rechargeable 12V Li-ION battery.

The SpectroPulverizer® In-Field Sample Grinding and Pelletizing Kit is contained in a rugged case which contains:

- Portable Grinder
- Grinding/Pelletizing chamber, base and plunger
- 12V Li-ION Battery and recharger
- Pellet Rings (3)
- SpectroVials® (8) 20cm³ vials
- SpectroBlend® (25) ½ gram tablets
- Portable Grinder
