

**Progeny™
ResQ™**

THE NEW GENERATION IN HANDHELD CHEMICAL DETECTION

PROGENY RESQ

HIGHLIGHTS

- **IDENTIFY** a wide range of drugs
- **RECORD** sample evidence
- **ANALYZE** more substances
- **CUSTOMIZE** the library

DETECT, IDENTIFY, RESPOND: **NARCOTICS**

Progeny ResQ enables law enforcement and border protection professionals to perform rapid identification of the widest range of drugs. Accepted by SWGDRUG as a Category A analytical technique, Progeny ResQ removes the subjectivity you face when working with some field testing kits.

Progeny ResQ has the ability to analyze more substances, including colored materials through packaging and even heroin (depending on the cutting agents), thus reducing the number of complementary techniques needed to remove controlled substances from circulation. You have the ability to easily customize the library to include the latest drug and cutting agent formulations, while documenting samples with a built-in camera.

PROGENY RESQ

HIGHLIGHTS

- **USE** while wearing M3-type protective suits
- **OBTAIN** results fast
- **OPERATE** safely in harsh environments
- **RESPOND** with confidence

DETECT, IDENTIFY, RESPOND:

WMDs/IEDs

Progeny ResQ provides border control and checkpoint security with the ability to make quick and informed decisions with confidence, while detecting the widest range of chemicals, precursors, explosives, and mixtures in its class. With easy, single-hand operation, you can now document sample images and results with Progeny ResQ's built-in digital camera.

Progeny ResQ's large screen display and buttons make it easy to use while wearing advanced explosive protective suits, while its MIL-STD-810G tested housing allows for use in harsh environments. In addition, Progeny ResQ's measurement delay timer is available for you to pre-set the appropriate time needed to safely analyze a suspicious threat.

PROGENY RESQ

HIGHLIGHTS

- **USE** while wearing Level A protection suits
- **OPERATE** in harsh environments
- **DETECT** more substances
- **IDENTIFY** with confidence

DETECT, IDENTIFY, RESPOND:

HAZMAT

Progeny ResQ delivers the most comprehensive substance identification tool to first responders and hazmat professionals. Containing a library of over 12,000 compounds – including common materials, TICs/TIMs, explosives, narcotics, and mixtures – Progeny ResQ has the ability to measure colored materials through packaging, reducing your fluorescence interference issues.

Progeny ResQ's large buttons and bright, easy to read display, allow you to easily view results with the touch of a button. In addition, its aluminum MID-STD-810G tested housing is durable for use in the field.

 **Rigaku**

DETECT, IDENTIFY, RESPOND WITH THE TOUCH OF A BUTTON

Progeny™ ResQ™ is the new generation in handheld chemical detection. Using Raman technology, Progeny ResQ provides emergency responders, law enforcement, and the military with the means to respond to incidents with confidence.

- Flexible for analysis of mixtures
- Durable for rugged use
- Nondestructive with no sample preparation
- Continuous use with long battery life

We understand you get called upon 24 hours a day, 365 days per year, which is why Progeny ResQ is backed by a global network of sales and service support partners to ensure we are there when assistance is needed.
